TRAP TURNER

Made specifically for semi-trailers, the Trap Turner puts the power in your hands. It takes the hard labor out of manually cranking traps. Unload trucks faster, easier and safer than ever before. The unit features forward/reverse operation and a “soft start” trigger to ensure a gradual, safe reaction. The output turns independently from the handle with no torque transmitted back to the user. The unit itself is quiet and non-impacting.

- Adjustable Torque (75-350 ft-lbs)
- Compact and Portable
- Light Weight
- Non Impacting Pneumatic Drive
- Quiet
- Adapters for Various Trailers

The Trap Turner is supplied complete with custom reaction arm, multi-position stabilization handle, industrial air hose, filter/regulator/lubricator, fittings to operate the most common trap styles and a 2 year warranty.

Options include: Secondary Trigger, Custom Adapters, Spring Balancers and more.
